

MICHELE PANAROTTO

Java Backend Developer with over five years of experience (since 2020) building backend systems for regulated financial software. Sole owner of a portfolio of Java / Spring Boot microservices – from analysis and design through release to production support. Open to relocation.

Padova, PD – Italy +39 348 210 7733 michelepanarotto00@gmail.com linkedin.com/in/michelepanarotto

PROFESSIONAL EXPERIENCE

Java Backend Developer

OCT 2021 – PRESENT

Galileo Network s.p.a. · Padova

CRM software for the financial sector.

- Sole owner of 10 Java / Spring Boot microservices (8 in production), some built from scratch and others inherited, across distinct functional domains – credit risk reporting, AML, document management, mail / PEC delivery, scheduling, questionnaires, consulting management, advanced task lists – from analysis to release to production support. These include Pulse for webhook management and orchestration (in production) and mail / PEC delivery over proprietary or customer SMTP with OAuth2 Google / Microsoft (PEC via MailDocPro). End-to-end ownership in a team where colleagues manage gateway and other services.
- Regulatory scope: primary data management for Bank of Italy reporting via external providers; design of AML risk scoring and updates workflow, orchestrated across multiple microservices (PEC = certified email, legally binding in Italy).
- Maintenance of the corporate framework used by development teams.
- Ownership of the document management microservice that centralizes company-wide legacy systems.
- Sole technical contact with external UI development company: coordination of deploys, bug fixes, and releases across three software products.
- Point of contact with support for error handling and with other departments for functional analysis on the UI and on the microservices I own, bringing the technical expertise to the table.

Path started with two internships (Sep–Nov 2020, Feb–May 2021) under a senior developer.

Bar & restaurant server (part-time) · Bar Ristorante al Pellegrino, Chiampo · Jun 2018 – Oct 2021

AI-POWERED DEVELOPMENT

Genuine enthusiasm and strong personal interest in adopting AI tools and bringing them into everyday development work.

Design and documentation of AI integration guidelines within the corporate framework: definition of standards and patterns used by development teams to integrate AI tools into their daily workflow.

Development of an internal application for log monitoring and consultation (personal initiative, zero cost). Introduction of automated GUI testing across managed software. Extension of technical operational scope – automation of research, analysis, and code generation tasks – reducing bottlenecks in dependencies on other teams.

EDUCATION & TRAINING

ITS – Web & Cloud Developer (level-2 specialisation)

JAN 2019 – AUG 2021

Fondazione ITS Kennedy ICT · Padova

ITS: a post-secondary vocational programme (2 years, ICT).

Web development: Git, SQL Server, networking & operating systems, Angular, C#, .NET, Java, Spring Boot, JavaScript, AWS, Azure, REST APIs.

Diploma in Computer Science & Telecommunications

2014 – 2019

IIS Silvio Ceccato · Montebelluna Maggiore

Object-oriented programming fundamentals (C++, Java) and web development (HTML, CSS, JavaScript, PHP), SQL.

SKILLS

BACK-END

Java · Spring Boot · Maven · Hibernate · REST API

DATA & TOOLS

SQL · Liquibase · Elasticsearch / Kibana · Docker · Alfresco · Git

TESTING

JUnit · Mockito · Spring Boot Test · Playwright

PRACTICES

Agile · Problem solving · SOLID

AI & LLM INTEGRATION

Framework guidelines design · LLM-assisted development · Code generation · Process automation · Webhook orchestration

ALSO

Angular · C# · JavaScript · AWS · Azure

LANGUAGES

Italian Native

English B2

Spoken, written and read without difficulty.
