

MICHELE PANAROTTO

Backend Software Engineer with over five years of experience (since 2020) building backend systems for regulated financial software. Sole owner of a portfolio of Java / Spring Boot microservices — from analysis and design through release to production support. Open to relocation.

Padova, PD — Italy +39 348 210 7733 michelepanarotto00@gmail.com linkedin.com/in/michelepanarotto

PROFESSIONAL EXPERIENCE

Backend Software Engineer

OCT 2021 — PRESENT

Galileo Network s.p.a. · Padova

CRM software for the financial sector. Preceded by two internships at the company (Sep-Nov 2020, Feb-May 2021).

- Sole owner of 10 Java / Spring Boot microservices (8 in production) in a financial-sector CRM used by [[ASK: how many banks / end users?]] — including the risk-management (Central Credit Register reporting) and document-management services, the two largest on the platform (~ [[ASK: rough size of these two — lines of code, endpoints, or tables?]]) and [[ASK: daily transactions / requests they handle?]]. Domains span credit-risk reporting, AML, document management, mail / PEC delivery, scheduling, questionnaires, consulting management and advanced task lists — from analysis and design through release to production support.
- [[ASK: your proudest single piece of work — what did you build or redesign, what was broken or missing before, and what measurably improved? (e.g. the AML risk-scoring calculation-and-update workflow orchestrated across multiple microservices — was that it?)]]
- Sole responder for production issues across these services — ~[[ASK: tickets per month?]] a month, average resolution [[ASK: average resolution time?]], with no escalation to senior staff.
- Single point of contact for the external UI vendor, coordinating deploys, fixes and releases across three products — [[ASK: roughly how many tickets, across how many releases?]].
- Daily AI-assisted development for ~12 months (~8 in production work), spanning design, implementation and documentation.

AI-POWERED DEVELOPMENT

Genuine enthusiasm and strong personal interest in adopting AI tools and bringing them into everyday development work.

Design and documentation of AI integration guidelines within the corporate framework: definition of standards and patterns used by development teams to integrate AI tools into their daily workflow.

Development of an internal application for log monitoring and consultation (personal initiative, zero cost). Introduction of automated GUI testing across managed software. Extension of technical operational scope — automation of research, analysis, and code generation tasks — reducing bottlenecks in dependencies on other teams.

EDUCATION & TRAINING

ITS — Web & Cloud Developer (level-2 specialisation)

JAN 2019 — AUG 2021

Fondazione ITS Kennedy ICT · Padova

Fondazione ITS Kennedy — two-year post-secondary vocational programme in ICT (EQF level 5), Italy's applied alternative to a bachelor's degree.

Web development: Git, SQL Server, networking & operating systems, Angular, C#, .NET, Java, Spring Boot, JavaScript, AWS, Azure, REST APIs.

Final grade: [[ASK: ITS final grade?]]

Diploma in Computer Science & Telecommunications

2014 — 2019

IIS Silvio Ceccato · Montecchio Maggiore

Object-oriented programming fundamentals (C++, Java) and web development (HTML, CSS, JavaScript, PHP), SQL.

Diploma grade: [[ASK: high-school diploma grade?]]

PROJECTS

[[ASK: 2-3 personal projects with GitHub links — for each: name, one line on what it does and why you built it, main tech, and the link. If you have none to show, say so and this section will be removed.]]

SKILLS

BACK-END

Java · Spring Boot · Maven · Hibernate · REST API

DATA & TOOLS

SQL · Liquibase · Elasticsearch / Kibana · Docker · Alfresco · Git

TESTING

JUnit · Mockito · Spring Boot Test · Playwright

PRACTICES

Agile · Problem solving · SOLID

AI & LLM INTEGRATION

Framework guidelines design · LLM-assisted development · Code generation · Process automation · Webhook orchestration

ALSO

Angular · C# · JavaScript · AWS · Azure

LANGUAGES

Italian Native

English B2

Spoken, written and read without difficulty.

[[ASK: official English certification (IELTS / TOEFL / Cambridge) and score — held or planned?]]
