

MICHELE PANAROTTO

Java Backend Developer with over five years of experience (since 2020) building backend systems for regulated financial software. Sole owner of a portfolio of Java / Spring Boot microservices — from analysis and design through release to production support. Open to relocation.

Padova, PD — Italy +39 348 210 7733 michelepanarotto00@gmail.com linkedin.com/in/michelepanarotto

PROFESSIONAL EXPERIENCE

Java Backend Developer

OCT 2021 — PRESENT

Galileo Network s.p.a. · Padova

CRM software for the financial sector.

- Sole owner of 10 Java / Spring Boot microservices (8 in production) across distinct functional domains — credit risk reporting (Banca d'Italia / Central Credit Register), AML risk scoring, document management, mail / PEC delivery, scheduling, questionnaires, advisory — from analysis through release to production support, in a team where colleagues own the gateway and other services.
- Regulatory scope: handling the initial reporting to Banca d'Italia (the Italian central bank) through external providers; designed the procedure to compute and update the AML customer risk score, orchestrated across several microservices.
- Maintenance of the in-house framework used by the development teams.
- Took over the document-management service that centralises the company's legacy systems.
- Designed from scratch a reusable task-list service that any microservice on the platform can consume.
- Mail and PEC delivery: proprietary or client SMTP with Google / Microsoft OAuth2; PEC (certified email, legally binding in Italy) via MailDocPro.
- Sole technical point of contact for the external company that develops the UI: coordinating deploys, bugs and releases across three products.
- Built an internal application to monitor and browse logs, delivered on my own initiative at no cost.
- Introduced automated end-to-end UI tests.
- Extended my operational scope to areas outside my usual stack (e.g. writing and editing batch scripts), reducing dependencies on other teams.

Path started with two internships (Sep–Nov 2020, Feb–May 2021) under a senior developer.

Bar & restaurant server (part-time) · Bar Ristorante al Pellegrino, Chiampo · Jun 2018 — Oct 2021
